Zakaria El Orche, Java Developer

Experienced Java Developer with a strong backend background, Proficient in a multitude of technologies and languages. Recognized speaker at OGR Event in Turin, emphasizing the evolving role of developers. Known for innovative Minecraft server monetization strategies. Eager to collaborate, contribute problem-solving skills, and foster a supportive team environment.

Employment History

Java Developer at FabledRealms

October 2023 — May 2024

As a Java Developer at FabledRealms, I contributed to the development and maintenance of Java-based applications. I utilized my skills in Java programming, version control with Git, and build automation with Maven. I also gained experience in containerization using Docker and continuous integration/continuous deployment (CI/CD) processes.

- Innovative Monetization for Minecraft Servers—developing diverse strategies to enhance revenue streams and provide a unique user experience.

Backend Developer at RMCloud

March 2022 — June 2023

As a Backend Developer at RMCloud, I crafted infrastructures with Express and Fastify, integrating MongoDB and WebSockets. I developed RESTful APIs for Minecraft proxy servers (Velocity, BungeeCord) and efficient data tunnels for sharded Minecraft server deployments.

- As a speaker at the OGR Event in Turin, I shared insights into the evolving role of developers in the technology landscape, highlighting the dynamic nature of our field.

Education

High School Diploma in Applied Sciences, I.I.S E. Majorana

September 2019 — July 2024
